

WE LISTEN.
WE THINK DIFFERENTLY.
WE FIND SOLUTIONS.

Medical devices that speak the language of the users.

SAFEFIX

- Softly padded hand and finger fixation for adults and children
- Two available variants: SafeFix with a mesh structure or double padded
- Legally not a measure which restricts freedom – no restraint on beds or furniture
- Single-use product

- Protection for patients who are a danger to themselves
- Prevents manipulation of infusions, catheters, drains or life-sustaining technical devices
- Warming measure for the hands

- Very comfortable, soft material

HOW TO SELL

Icebreaker: Questions to ask your customers

- How often do you get patients trying to remove catheters or cannulas?
- Do patients scratch, extubate or endanger themselves or others?
- What are the challenges your nursing staff face?

Target group: This is where the SafeFix is needed

Intensive Care Unit | Neurology | Wards with elderly patients | Nursing homes

Benefits: for clinics and clinic staff

- Increased patient safety without a risk of injury
- Relieving the burden on nursing staff by reducing the need for monitoring
- Gentle solution for patients with restlessness, delirium, dementia or neurological impairments
