# CROSSSEAT

- Versatile mobilisation chair
- Attachment to any commercially available hospital or nursing bed (strap system is included)
- Air filling quantity can be adapted to the patient's weight and body shape
- Can be combined with the CrossSeat Table for more independence, e.g. independent eating in the transverse bed

- Care and care of patients in the transverse bed
- Efficient and easy mobilisation with no technical effort
- Combination with ThoraXsafe for stabilisation or fixation in the chest or pelvic area in the transverse bed

- Very light (5 kg)
- Foldable and stowable in a compact bag with the patient to save space

## HOW TO SELL

### Icebreaker: Questions to ask your customers

- How much storage space do you have for your current transverse bed chair?
- Does your current model fit in every bed and is it universally compatible?
- How satisfied are you with the weight, handling and sitting comfort?

### Target group: This is where the CrossSeat is needed

Intensive Care Unit | Nursing homes - to mobilise older or more immobile patients

### Benefits: for clinics and clinic staff

- Space-saving, easy to transport and intuitive to use
- Maximum comfort for patients during mobilisation
- Particularly suitable for areas with limited storage capacity
