WE FIND SOLUTIONS.

Medical devices that speak the language of the users.

# TRANSFIX

- Structured cable and tube management system consisting of a soft, extra-wide cuff for fixing tubes and cables
- Three Velcro fasteners on the padded cuff for organised attachment

- Keeps order and clarity when repositioning patients who have many cables, tubes, etc.

- Foam cuff

## HOW TO SELL

### Icebreaker: Questions to ask your customers

- Have you experienced situations of dislocation or leakage?
- How satisfied are your nursing staff with the current solution?
- Have there been any complaints from patients?
- How reliable is your cable management solution for mobile or restless patients?

### Target group: This is where TransFix is needed

Intensive Care Unit | Anaesthesia | A&E | IMC

### Benefits: for clinics and clinic staff

- Ensures secure fixation with no tensile load · Maximum comfort for patients during mobilisation
- Reduces complications and saves time in everyday care, for example optimal catheter management for patients who have to be transported or for a constant overview even in an emergency
- Standardised and easy-to-use solution

## ITEM INFORMATION
