

WE LISTEN.
WE THINK DIFFERENTLY.
WE FIND SOLUTIONS.

Medical devices that speak the language of the users.

H500

- Urine meter for easy urine collection and measurement of urine volume
- Closed system consisting of a drip chamber with check valve, needle-free sampling point on the connector and drip-free bottom outlet valve
- Precise measuring chamber and drainage bag each with check valve and hydrophobic filter
- Universal attachment option with straps, cord or fold-out double hooks

HOW TO SELL

Icebreaker: Questions to ask your customers

- How do you currently ensure accurate urine measurements?
- Are there reading errors or backlogs in the system?
- What role do needle-free systems play for you?

Target group: This is where the H500 is needed

Intensive Care Unit | Anaesthesia | Urology | IMC | Inpatient care | Intensive care

Benefits: for clinics and clinic staff

- Closed system for maximum hygiene – reducing the risk of retrograde bacterial contamination of the bladder
