

WE LISTEN.
WE THINK DIFFERENTLY.
WE FIND SOLUTIONS.

Medical devices that speak the language of the users.

H6 PLUS

- Closed urine drainage system
- Bottom outlet valve opens and closes precisely and is drip-proof (flexible funnel connector)
- Sampling at the port is needle-free
- Connector to the catheter, including the sampling port, is very easy to clean in a hygienic manner
- Sliding clamp on the tube to open and close the urine collection bag
- Four options for fastening or hanging

- Disposable product
- Latex-free, non-sterile

HOW TO SELL

Icebreaker: Questions to ask your customers

- How satisfied are you currently with your existing urine drainage system in daily handling?
- Where do you see the biggest challenges with your current bags – hygiene, backflow problems or ease of use?
- What requirements are most important to you in a closed system – infection prevention, safety or cost-effectiveness?

Target group: This is where the H6 Plus is needed

Intensive Care Unit | IMC | Nursing | Inpatient care | Intensive care | Urology

Benefits: for clinics and clinic staff

- Precise measurement
- Hygienic system
- Easy integration
